

DECLARATION OF INTELLECTUAL PROPERTY

Copyright & Original Ownership Documentation

I. IDENTIFICATION OF THE WORKS

Primary Title:	Text Base "A Text RPG"
Supporting Work:	ai.py — Original Chatbot / AI System
Genre / Format:	Text-Based Role-Playing Game (RPG) with original AI system
File 1 Header Date:	November 19, 2018 (textBase.py embedded header)
File 2 Timestamp:	February 5, 2019 (ai.py)
Document Generated:	May 21, 2026
Nature of Works:	Original Python Software — Game Engine + AI System

II. CREATOR & RIGHTS HOLDER

Legal Name:	Blake Evan Davis
File 1 Header Credit:	"Blake Davis — Lead Developer / Project Manager"
Role:	Sole Original Author, Creator, and Rights Holder
Ownership:	100% Human-Authored — Original concept, design, and code

III. DESCRIPTION & CREATIVE VISION

Text Base "A Text RPG" is an original interactive text-based role-playing game conceived, designed, and coded entirely by Blake Evan Davis beginning November 19, 2018. The game features a comedic friendship narrative built on random humor that is wholly fictional and intended in good fun. No content is presented as factual; all scenarios, characters, dialogue, and game mechanics are products of the creator's imagination.

In addition to the core game, Blake Evan Davis independently developed ai.py — an original rule-based chatbot system written entirely in Python, timestamped February 5, 2019. This file demonstrates the creator's expanding technical vision for the project, building original AI interaction systems to complement the game. This is not a third-party AI tool — it is original handwritten code authored solely by Blake Evan Davis.

The creator continued developing Text Base because it represents a deep emotional bond — a personal connection that transcends code and design. In the creator's own words, this game is "part

of my life and soul."

IV. BASIS OF OWNERSHIP CLAIM

- 1. Embedded File Header (textBase.py):** The primary game file bears the header "Author: Blake Davis / Date: 11-19-18" directly in the source code, establishing authorship at creation.
- 2. Original AI System (ai.py):** A second original Python file dated February 5, 2019 demonstrates the creator independently building supporting systems — entirely by hand, with no external AI tools.
- 3. Original Concept & Design:** The game concept, rules, combat system, world locations, characters, narrative, and humor were conceived entirely by Blake Evan Davis.
- 4. Credited Collaborators:** Aaron Smith (Lead Creative) and Keaton Pedersen (Lead Storywriter) contributed under the creative direction of Blake Evan Davis as Lead Developer and Project Manager.
- 5. AI Tools as Instruments, Not Authors:** Any AI coding assistance used during development served purely as a tool — equivalent to an IDE or compiler. Intellectual ownership remained solely with Blake Evan Davis.
- 6. Continuous Development:** Ongoing updates and expansion since 2018 further establishes sustained authorship and ownership.

V. DEVELOPMENT TIMELINE

Date	File	Significance
November 19, 2018	textBase.py	Core game created — author header embedded in code
February 5, 2019	ai.py	Original AI chatbot system developed to expand the game
Ongoing	Continued development	Sustained creative authorship under Blake Evan Davis

VI. LEGAL BASIS SUMMARY

Under U.S. copyright law (17 U.S.C. § 102), copyright protection attaches automatically to original works of authorship fixed in a tangible medium the moment they are created. Both textBase.py and ai.py constitute fixed, original works authored by Blake Evan Davis. No registration is required for copyright to exist, though registration with the U.S. Copyright Office strengthens legal standing significantly.

The use of coding tools, collaborators, or AI assistants acting under the direction of the original author does not transfer or diminish copyright ownership. The creative vision, direction, and authorship belong solely to Blake Evan Davis.

VII. EVIDENCE OF AUTHORSHIP

Evidence Item	Details
Embedded File Header	Author: Blake Davis Date: 11-19-18 File: textBase.py
In-File Credits	Blake Davis listed as Lead Developer / Project Manager
ai.py Timestamp	February 5, 2019 — original handwritten chatbot system
Chat Log Documentation	Conversation on record confirming authorship and creative process
Continuous Development	Ongoing updates and expansion since original creation
Personal Statement	Creator's sworn statement of personal and emotional authorship

VIII. EXHIBIT A — ORIGINAL SOURCE CODE (textBase.py)

Complete original source code of Text Base "A Text RPG" as authored by Blake Evan Davis. Note the embedded author header confirming authorship and date.
